Report Type: OTHER CLEANUP ACTIVITY 001

Report Developed by:

**DECISION:**

☐ 1. Further Remedial Site Assessment under CERCLA (Superfund) is not required because:

☐ 1a. Site does not qualify for further remedial site assessment under CERCLA (No Further Remedial Action Planned - NFRAP)

☐ 1b. Site may qualify for action, but is deferred to:

☒ 2. Further Assessment Needed Under CERCLA:

2a. Priority: ☐ Higher ☒ Lower

2b. Other: (recommended action) Low

Site: Maline Creek  
ID #: MOD980631162  
Break: 3.5  
Other: 9/2/01 SD

**DISCUSSION/RATIONALE:**

A desk top review was conducted on 9/21/2001, to determine the status of the site.

This site is in the State VCP.

(SMARS, dated 12/22/1999): Consturction of the retaining wall has continued through most of 1999. High water in late spring required work to stop for about oe month. The wall is largely complete as of this entry. Final completion should occur in the first or second quarter of 2000. No significant problems have been encountered, and those raised early on by GAF and St. Gobain external counsel have been resolved.

(SMARS, dated 6/5/2001): Construction of the wall was substantially completed in late summer/early fall of 2000. No significant problems were experienced once construction got underway. Establishment of vegetation was the last aspect of the project to be completed. Remaining activities include the participant getting Metro. Sewer District approval of the final as-built plans (plans were submitted to MSD in early 2001) and finalization and recording of the Restrictive Covenant for the site. MSD will be tasked with maintenance and upkeep of the wall through agreements with St. Gobain and GA, although at this time I do not believe those agreements have been finalized.

A visit to the site by the VCP project manager is scheduled for June 6, 2001.
